Hyderabad, Telangana, India | github.com/sripriya2004-15

SUMMARY

- Detail-oriented Graduate Software Engineer with core expertise in Java, Python, RESTful API design, and multi-platform application architecture.
- Strong foundation in software systems design, data structures, object-oriented concepts, and relational database modelling using MySQL and JDBC.
- Skilled in writing modular code, executing structured test plans, debugging application logic, and leveraging build tools like Maven and Postman.
- Proven ability to collaborate in project teams, translate requirements into robust solutions, and rapidly adapt to cross-functional development workflows.

EDUCATION

Bachelor's in Technology (B.Tech) in Computer Science Engineering , RGUKT Srikakulam GPA: 8.1/10	2022–2026
Intermediate (12th) in MPC , RGUKT (IIIT) Srikakulam GPA: 8.94/10	2020–2022
SSC in 10th Standard , ZP High School, Inamanamellur GPA: 10.0/10	2019–2020

INTERNSHIP EXPERIENCE

Java Developer Intern <i>Ansol Consultancy Services</i>	Aug '25 – Present <i>Hyderabad, India</i>
• Engineered core backend applications and application logic using Java and Spring Boot frameworks. • Designed, developed, and integrated RESTful APIs to manage database interactions and system workflows. • Executed testing protocols, logged issues, and refactored code modules to debug and optimize system performance. • Collaborated with project team members to build reliable, high-quality software enhancements for core systems.	
Web Development Intern <i>SkillDzire, RGUKT</i>	May '25 – Jun '25 <i>Srikakulam, India</i>
• Developed and deployed responsive web applications following established UI/UX and software design standards. • Implemented interactive client-side components and validated user workflows using HTML, CSS, and JavaScript.	

PROJECTS

Bookstore Management System
• Built a scalable web application with secure user authentication, order processing, and inventory management. • Designed and integrated RESTful APIs using Spring Boot for reliable session control and transactional operations. • Modelled a MySQL relational database schema to support complex backend query requirements and data integrity.
Employee Management System
• Created a Java application utilizing JDBC to connect backend services with relational database systems. • Implemented modules for executing optimized CRUD operations, data validation, and record searching.

SKILLS

Programming Languages: Java (Core & Advanced), Python, JavaScript (ES6+)
Systems & Frameworks: Spring Boot, RESTful APIs, JDBC, Hibernate, Microservices Basics
Web & Frontend: ReactJS, HTML5, CSS3, Bootstrap, Responsive Design
Databases & Testing: MySQL, Database Connectivity, Postman, Unit Testing, Debugging
Tools & Workflows: Git, GitHub, Maven, Systems Software Architecture, Agility

KEY STRENGTHS

- Strong analytical thinking and structured problem-solving skills for code debugging and troubleshooting.
- Solid theoretical knowledge of operating systems, networking basics, and software design principles.
- Effective verbal and written communication skills with experience collaborating in virtual team environments.
- Independent worker capable of exercising sound judgment within project parameters to meet goals.
